

# HOW TO CREATE YOUR OWN DUBLIN CITY OF SCIENCE 2012 ROBOT:

- 1 Using the scissors cut out the robots' head, legs, body & arms along the black dotted lines.
- 2 Gently fold the shapes along the lighter undotted 'crease lines' folding down the numbered tabs as you go.
- 3 Using sticky tape attach the head of your robot to the top of the robot body, and then the feet to the bottom of the robot body.
- 4 To put the final touches to your robot attach the arms to either side of the body using sticky tape.
- 5 Now, it's time to give your robot a name!
